## PROFESSIONAL SUMMARY

Computational + experimental antibody researcher developing an integrated approach across computational discovery, wet-lab validation, statistical interpretation, and clinical translation.

## EDUCATION

**2026** **M.S., Food Science and Technology; Minor in Statistics**
*University of Nebraska–Lincoln*

**2024** **B.Sc., Food Science and Technology; B.Eng., Food Science and Engineering (Dual Degree)**
*University of Nebraska–Lincoln / Northwest A&F University*

## RESEARCH EXPERIENCE

**10/2026-Present** **OPS Research Assistant**
*Department of Infectious Diseases and Immunology, College of Veterinary Medicine, University of Florida*

- **Investigate** how human VH–VL framework architecture influences predicted antibody–antigen recognition.
- **Develop** in-silico design pipelines using framework grafting, native controls, and epitope-masked evaluation.
- **Run** large-scale AlphaFold2 antibody–antigen predictions; evaluate confidence, docking accuracy, and contacts.
- **Benchmark** RFantibody and BindCraft2; build and audit workflows with AI coding agents (Claude Code, Codex).

**07/2024–07/2026** **Graduate Research Assistant**
*Department of Food Science and Technology, University of Nebraska–Lincoln*

- **Coordinated** a 12-week, three-phase randomized crossover dry bean trial (IRB-approved; NCT06935435).
- **Co-developed** the NIH-style protocol, consent form, and recruitment materials; authored 4 SOPs; ran 200+ visits.
- **Assisted** a biobank study; processed blood and stool samples, ran PCR, and analyzed clinical data in R and Python.
- **Led** a PROSPERO-registered review: ML screening of 1,800+ records; LLM-assisted, human-verified extraction.

**04/2022–06/2023** **Undergraduate Research Assistant**
*College of Food Science and Engineering, Northwest A&F University*

- **Co-led** a thesis on how three lactic acid bacteria change phenolics, antioxidants, and starch digestibility of millet.
- **Quantified** bran cake color by spectrophotometry and synthesized 50+ articles for a review; co-authored 2 papers.

## SELECTED PUBLICATIONS & AWARDS

**Published:** Xiao J, et al. Foods. 2023;12(15):2964; Deng X, et al. J Sci Food Agric. 2023;103(9):4257–4267.
**Presentations:** 1 talk and 4 posters, including the Missouri Valley Branch ASM Annual Meeting and Nebraska Research Days.
**Awards:** Chancellor's Graduate Research Grant Award; Excellence in the Department of Food Science and Technology; Mary and Charles C. Cooper/Emma I. Sharpless Fellowship; National Undergraduate Life Sciences Research Silver Prize

## SKILLS

**Computational Antibody Modeling:** AlphaFold; de novo design (RFantibody, BindCraft2); AI agents (Claude Code, Codex)
**Clinical Research:** propose, design, and lead human clinical trials; grant proposal writing; protocol development and execution; IRB/GCP processes and review requirements
**Wet Lab:** PCR; human blood and stool sample processing; in vitro fermentation; spectrophotometric assays
**Statistics & Languages:** interpreting multivariate and multiple regression analyses; Mandarin (native), English (fluent)

## LEADERSHIP

**Graduate Representative (Secondary), UNL (2025–2026):** Advocated for food science graduate students.
**Graduate Student Advisory Board Member, UNL (2024–2025):** Founded a peer-mentoring program.
**Communications Lead, Northwest A&F University (2020–2022):** Directed a 13-member newsletter and video team.
**Teaching & Mentoring, UNL (2023–2026):** TA for FDST 458, 412, 429, and NUTR 250; guest lecturer, FDST 498; mentored 3.
